Go live

Account opening

Amazon global seller account will be opened.

This will be done with company's Indian entity KYC documents, Banking and Tax details.

Common payment gateway will be Integrated to give consolidated payment in USD .

For other market places the registration must be region wise .

Compliance for operating business

All regions have different requirement

USA – No entity and no tax number required

Canada – No entity required , need VAT Number

UK – No entity required , need VAT Number

EU – No entity required , need VAT number .

Australia – No entity required no tax number .

UAE – need to do product registration, Entity formation and VAT . (This can be management by notional 3rd part)

Product compliance

Product compliance is Region wise.

A third party agency services will be used for compliance part and all certifications.

Logistics and warehouse

- All good will be shipped by sea .
- There are logistic partners who will take part shipment from your warehouse to destination warehouse .
- Taking care of custom clearance at destination port
- For amazon and Walmart, we will make consignment label in India and good will leave with consignment stickers .
- As the business grow, we may require 3PL warehouse which will be aligned by our team region wise .

Product assortment

Market wise, category wise top seller and the sales data will be provided to for understanding market potential.

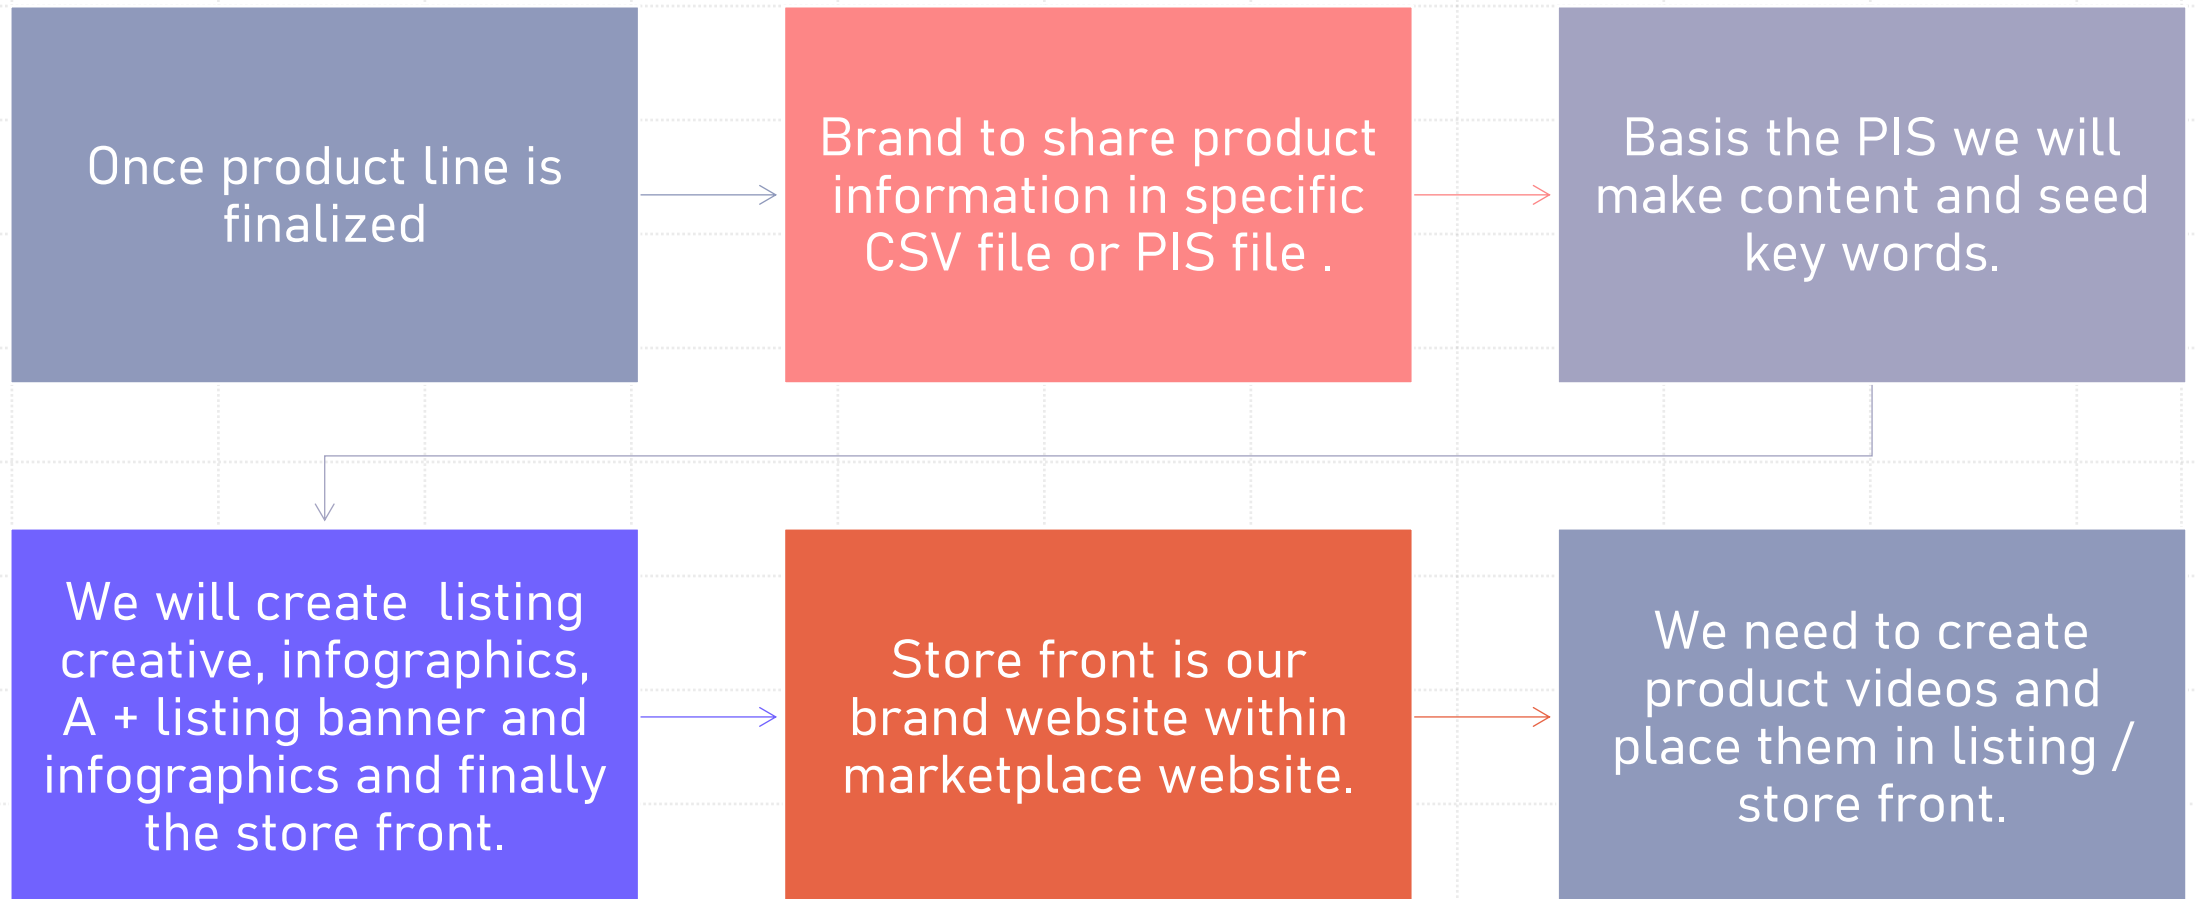

Based on this data we can match the product line

Once product is identified we do price benchmarking

To ensure product selling is viable, in the proposed price we will share markdown calculation to find net realization .

Bases this data we finalize assortment
